

STOP SPENDING MONEY ON AIR

The new Scooptram ST7 Battery eliminates diesel emissions and minimizes the need for ventilation.

Reducing the need for ventilation means cutting your overall operation costs.

Atlas Copco

THE NOW FULLY ELECTRIC, BATTERY POWERED SCOOPTRAM ST7 IS MORE FLEXIBLE, PRODUCTIVE AND EFFICIENT THAN EVER. THE ELECTRIC DRIVE ELIMINATES DIESEL EMISSIONS AND MINIMIZES THE NEED FOR VENTILATION. THIS REDUCES NOT ONLY OVERHEAD, BUT OPERATION COSTS OVERALL.

Eliminating the power cable gives you all the maneuverability of diesel loaders. Long battery life and powerful motors provide the capacity to outperform diesel in most applications.

Not only is the air cleaner with battery power, but 80% less heat is generated and noise is lowered. This creates a healthier, more comfortable, and safer workplace.

The Battery Scooptram shares 90% of its components with the successful diesel Scooptram, reducing your stock requirements. Spare parts and product support are accessible, even in the most remote places.

Greater flexibility at reduced costs

- Operate at deeper levels with no need for ventilation
- Lower cooling costs underground thanks to greatly reduced heat generation
- Easily move Scooptram between work areas
- Gain room to maneuver other equipment around the loader
- Reduce your carbon footprint

Long lasting energy

- Custom made Artisan battery built for harsh conditions
- Quick battery change enables a 24/7 operation with just two batteries
- Similar performance as the diesel machines in most applications
- Operator efficiency and morale boosted by more comfortable conditions

Automation ready

Optimize your Scooptram ST7 Battery with smart automated functions

- Control multiple loaders from a safe, remote location
- Plan and repeat the perfect production cycle, every time
- Rigscan reduces machine wear while decreasing downtime and expenses

Standard features

- ISO and ROPS/FOPS approved canopy for safe, ergonomic operation
- Atlas Copco Footbox adds legroom for the operator
- Rubber Cabin Mounts for reduced vibration

THE NEW BATTERY POWERED SCOOPTRAM ST7

These days, switching to battery power may not seem like a big deal. Cleaner air, less noise, less heat are all obvious benefits of the fully electric Scooptram loader. But there are many other benefits to consider.

With the new Scooptram, you will quickly see benefits. Those benefits include reduced costs for mine ventilation and cooling, the ability to work at deeper extremes, and increased operator comfort and safety.

All this adds up to something that might not be as obvious, like a reduced environmental footprint, higher worker satisfaction, and a better standing in the community. Now that's a big deal.

Stop spending money on air. Please flip the folder.

This air has been pumped down through thousands of meters of ventilation shafts. A process that in minutes turns free air into something very expensive.

400 ml.
Approx. 8 breaths.
